HEADING FAST INTO FOREIGN TROUBLE

Alexander the Great, conquered the world, but could not hold it. Napoleon thought he could out-rival Alexander, but history has a blank space until we get down to the New Deal when Franklin D. Roosevelt, with a beer bottle in one hand and his witch-stick in the other did the Paul Revere stunt on a Democratic jack-ass. Having displaced St. Peter with Farley, the prize-fight promoter, reconstructed the American financial structure, revalued the dollar with paper currency that has no gold or silver backing, issued inflation bonds by the bale, forced down the earnings on each life insurance policy in the United States, Franklin, the Great, reaches across the sea to settle the financial affairs of many nations that not only owe us billions but frankly challenged the Roosevelt administration to try and collect.

The U. S. Treasury, headed by a Fifth Avenue play boy from a millionaire family, purchased a million English pounds thrown on the market by the Russian government. Russia wanted to get rid of the credit and the U. S. gets the pig-in-a-poke, at a "real profit." Where the profit can be to this country has people guessing. England will not buy back her own money and other European countries do not want it for the same reason. Russia sold. We must have a purchaser before any profit can be gained. Once again the good old U. S. A. dumps good money in a rat-hole after bad. Russia took our gold for England's off-the-gold standard pounds. We now find ourselves where it is criminal to own a \$5 gold piece, yet foreign countries only trade with the New Dealers on a "gold basis."

When we hear a statement upholding the New Deal, we wonder if Harry Hopkins was not right when he said, "the people are too damn dumb to understand" what the New Deal is. Harry may be right but when the farmer, manufacturer, businessman and all labor starts paying the cost of the New Deal, there will be "Hell on the Potomac."

"Ramona" Beautiful Romance in Color

Loreja Young, one of the most beautiful ladies in filmland has the starring role in 20th Century-Fox's new natural outdoor color picture, "Ramona," which includes an able supporting cast headed by the romantic Indian lover, Don Ameche. Never before has the American theatergoer experienced such perfection in color camera work as is to be enjoyed in "Ramona." Filmed almost entirely out-of-doors, with beautiful sunsets, dawns, streams, green meadows, mountains, and giant trees as its background, "Ramona" establishes a new note in perfect color photography. The music set to this love story is of course known the world around, having been among the most popular scores of the present century. "Ramona" will open a week's engagement at the Regent

theater in Springfield, Friday. Countless groups of regular and irregular theatergoers in this section will undoubtedly avail themselves of this opportunity to enjoy this great picture with the pleasure and comforts afforded by a modern, deluxe city theater.

This State theater in Springfield has announced as its week-end attraction opening Saturday, Warner Bros. breath-taking and history making aviation film, "China Clipper," starring Pat O'Brien. "China Clipper" is the screen story of the most daring and outstanding successful commercial aviation feat in history to date. It tells the exciting story of the flight of the giant 7-ton flying boat, and reaches a breath-taking climax with a complete record of the great flight the Clipper ship made from California to China last November.

A.B.C. of TAXES

BY BERT FOSTER

TAXES LYING IN AMBUSH

THE nation's major farm products—wheat, meat and milk—produce more in taxes than in farm products. Read that sentence over again, and let the fact sink in.

No farmer, nor any one else—not even a person on relief—escapes from paying taxes, for taxes are adroitly concealed in the price of everything we buy.

Temperance Notes

Sponsored by

Cedarville W. C. T. U.

The Reformed church in its General Synod at Rochester, N. Y., adopted strong resolutions against the liquor business, calling for stricter control and better enforcement of liquor laws and for heavy penalties for those who do not obey. The church is prepared for a vigorous campaign against the liquor traffic and its results.

The recent General Assembly of the Presbyterian church at Syracuse, N. Y., in its criticism of the liquor traffic said: "With unparalleled power and brazen insolence, the traffic in alcoholic beverages is continuing to decrease the economic, physical, moral and spiritual values of the people. Only the unseeing can fail to be gravely concerned because of the effects of the widespread and increasing use of alcohol."

Where is the "forgotten man?" He seems to have been forgotten by the newspapers and public speakers of late. Also forgotten is the promise of no return of the saloon; forgotten is the doctrine of strict regulation; forgotten is the promise of no more bootlegging; forgotten is the promise of obedience to law.

In an election held June 25, North Dakota voters retained its dry law by a 25,000 majority.

F. D. R. in accepting the nomination as candidate for re-election did not inform the nation how he had balanced the budget on a beer keg.

A liquor advertisement says: "Beer intensifies the joy of social conversation." Yes, we have noticed that the conversation is greatly intensified, loudly—profanely so.

Dr. D. Leigh Colvin in his acceptance speech of nomination for President on the Prohibition Party ticket said: "Repeal changed the attitude of the government toward the liquor traffic from that of opposition, or prohibition to that of permission and protection. Prohibition placed trafficking in liquor in the class of crimes where it belongs because of the seriousness of its consequences to society. Repeal legalized, authorized and sanctioned that traffic."

Get Warm QUICK

That's one thing you can do with the new Duo Nubian, because of its special perforated casing that allows the heat to radiate directly into the room just like it does from a good oak or a base burner. Yet, the Duo Nubian circulates moist, warm air all through the house. And this is important—its special construction eliminates the cold drafts across the floors that you find with so many circulators.

Come down to the store and see with your own eyes this marvelous new heater that brings an entirely new type of comfort to stove heated homes.

The Cleveland, O., Plain Dealer of June 23 contained an editorial on "Booze at the Wheel" in which it said: "The deadly work of those who drink and then drive has become a matter of everyday news reporting." The editorial cites the case of a man "with his head aflame with liquor, his mind clouded and his vision blurred" who wrecked three cars and injured three persons. "Others in his condition have zigzagged their way through traffic with even more tragic results. It ought to be a matter of common knowledge that a man or woman who drinks and then drives is an enemy to be shunned by his friends and suppressed whenever possible by society." A good editorial but inconsistent because in the same issue of the Plain Dealer there were 218 square inches of liquor advertising.

Maintains his office at 12 East High Street with Worley's Inc.

Many people go about with their eyes bothering them and think that their sight will come back. We have yet to hear of that happening when their eyes have been neglected too long. Even Optical Science has its limitations which no amount of money can overcome. It can not completely correct eye conditions, but it can prevent them. An early examination and glasses to meet your needs will prevent the necessity of ever having to know that you can't buy your eyesight back.

Avoid the risk of your children becoming nervous and ruining their eyes. Have their eyes examined now. If Dr. Smith finds after the examination that glasses are not needed, he will tell you so.

Dr. Smith has the various styles in mountings, and features a weekly payment plan.

DR. ERNEST BOVEY Chiropractor

Maintains offices at 201-202 Arcue Building.

A Chiropractic Specialist is a Bio-Engineer. Bio-Engineering is a study of the mechanics of the human body, and is founded upon the law of gravity. Its analysis and correction of faulty body mechanics are upon a mathematical basis, hence exact and scientific. In other words, true engineering principles are applied to the human body.

Through the application of engineering principles, it has been determined that loads that exceed the elastic limit of any structure that sustains them, distort that structure, and this distortion is permanent when the center of gravity of that structure moves from its natural position. The same is true of the human body when it is strained. Disease can only be permanently eliminated when all distortion of the body is removed, which restores the center of gravity. Distortions are eliminated by spinal adjustments.

Correct diagnosis then is of first importance, for specific connections can only follow correct analysis. We recommend Dr. Bovey to those who desire Chiropractic treatments.

Rudolph Wurlitzer Co.

30 South Limestone Street, is the musical headquarters for the people of this community.

The world's thought today is so much engrossed with radio and movies that the tendency is to follow the lines of least resistance and much of the day is crowded with superficial things. It is so easy just to turn on the radio that even mothers forget the necessity of music to round out their children's education and adults neglect their own till the opportunity passes by. If this condition would continue, the time would soon come when we would have nothing but mechanical music and there would be no artists to play for the multitudes.

If you have children in the home, there should be a piano there. Wurlitzer's are featuring a brand new small upright piano, plus 25 lessons on easy payments, as low as \$1.25 per week.
